The Honorable Robert Aderholt
Chairman
House Appropriations Committee
Labor, HHS, Education Appropriations
Subcommittee
Washington, DC 20515

The Honorable Rosa DeLauro
Ranking Member
House Appropriations Committee
Labor, HHS, Education Appropriations
Subcommittee
Washington, DC 20515

**Support the Health and Safety of Workers Nationwide with Recommended FY 2024
Funding of OSHA at \$738.7 Million and NIOSH at \$375.3 Million**

Dear Chairman Aderholt and Ranking Member DeLauro:

As we still realize the impact of the COVID-19 pandemic, we know the vital role of occupational safety and health to the well-

NIOSH funding supports many important programs, including AgFF, ERCs, and TWH. The agriculture, forestry, fishing, and hunting industry preventable fatality rate is six times that of the all-industry average.³ In 2021, over 17,100 workers in this sector were injured seriously enough to require time away from work. In addition, 453 workers died.⁴ Furthermore, due to its decentralized nature and diverse structure, the agriculture, forestry, and fishing sector lags other industries in reducing the toll of work-related injuries and illnesses.

Directed by Congress, NIOSH established Centers for Agricultural Disease and Injury Research, Education, and Prevention in 1990 in response to evidence that agricultural workers were suffering higher rates of injury and illness than other U.S. workers. Today, the initiative includes ten ty.⁵ These centers have conducted research leading to evidence-based standards that save lives. It is the only substantive federal effort to ensure safe working conditions for workers in one of our

With an aging occupational safety and health workforce, the NIOSH Education and Research Centers are essential for training the next generation of professionals. The ERCs establish academic, labor, and industry research partnerships to achieve these goals. Currently, the 18 ERCs⁶ occupational safety and health graduates who will go on to professional roles. NIOSH also supports education and research in occupational health through academic degree programs and research opportunities.

The National Occupational Research Agenda continues to protect American workers through its work-related illness and injury research and TWH integrates workplace interventions that protect safety and health with activities that advance the overall well-being of workers.

provide FY 2024 funding for OSHA at a minimum of \$738.7 million and NIOSH at a minimum of \$375.3 million. Thank you for your consideration of our request.

Sincerely,
